

**FROM THE UXBRIDGE BOARD OF HEALTH AND THE UXBRIDGE DOG  
OFFICER**

**RABIES HAS ARRIVED IN THE TOWN OF UXBRIDGE!**

The Town of **Uxbridge** has tested **positively for rabies** in both **wildlife and domestic** animals for the past few years. Our pets are the bridges between rabies and people. VACCINATE PETS to

PROTECT YOUR FAMILY from this **deadly disease**. Keep your children away from strays and wild animals. If you are bothered by wildlife call a licensed professional wildlife specialist. Local authorities are, by law, not allowed to handle wildlife and it is against the law to relocate wildlife.
